PROFESSIONAL EXPERIENCE

PRODUCT OWNER – AI CHATBOT PLATFORM | M_Service (MoMo) 03/2025 – Present

- Contribute the development of an AI Chatbot Platform designed to automate business processes and enhance user interactions through Large Language Models (LLMs).
- Gather and analyze business requirements from stakeholders, translating them into Product Requirement Documents (PRDs), User Stories, Use Cases, Wireframes, and Acceptance Criteria.
- Manage the Product Backlog, prioritize features based on business value, and coordinate sprint planning and release activities following Agile methodologies.
- Collaborate closely with Backend Developers, Frontend Developers, QA Engineers, and UX/UI Designers throughout the product development lifecycle.
- Participate in Sprint Planning, Backlog Refinement, Sprint Review, and UAT processes to ensure successful product delivery.
- Research and propose new product features and enhancements to improve platform performance and user experience.
- Monitor product performance and identify opportunities for continuous improvement through user feedback and operational metrics.

Core Product Modules

- User Management
- Project Management
- Secret Management
- Bot Management
- Bot Version Management
- LLM Management
- Knowledge Base Management
- Conversation Management
- Trace Management

Key Contributions

- Designed a centralized platform for managing AI Chatbots and AI Agents across multiple projects.

- Built version management capabilities to support controlled releases and rollback mechanisms.
- Contributed to the development of Knowledge Base and AI Search functionalities powered by Retrieval-Augmented Generation (RAG).
- Supported the implementation of Agent tools for API integration, knowledge retrieval, and automated task execution.

BUSINESS OPERATIONS & GROWTH EXECUTIVE | MIA Retail

10/2024 – 05/2026

- Worked closely with Marketing, E-commerce, CRM, Supply Chain, Finance, and Technology teams to identify business needs and propose operational improvements.
- Defined KPI frameworks and developed BI dashboards to monitor GMV, Conversion Rate, CAC, ROAS, and Customer Retention.
- Analyzed customer journeys and identified pain points to improve conversion rates and customer experience.
- Participated in the implementation of AI Assistants, Workflow Automation solutions, and Chatbot initiatives.
- Delivered business insights and recommendations through data analysis and performance reporting.

E-COMMERCE PRODUCT MANAGER | Larita Project – MIA Retail

02/2026 – 05/2026

- Managed the end-to-end product launch of the Larita luggage brand across TikTok Shop, Shopee, Website, and Offline channels.
- Defined product vision, product roadmap, and KPI framework across multiple launch phases.
- Developed Customer Personas, Customer Journey Maps, and CRM strategies to drive customer acquisition and retention.
- Coordinated 6–7 cross-functional teams, including Design, Content, E-commerce, Digital Marketing, Operations, and Offline Sales.
- Tracked product performance and recommended data-driven improvements throughout the launch lifecycle.
- Leveraged AI tools and customer insights to support market research, product positioning, and strategic decision-making.
